

The campaign to create a new Country Park near you!

What?

A Country Park to benefit the local community and provide a haven for wildlife.

A place for everyone to enjoy; ride a bike, walk your dog, or just sit and relax in nature. Our green vision includes accessible paths for pushchairs and wheelchairs, bike paths, bird hides, woodland and wild areas.

A space where people and wildlife can flourish.

Why?

There is a severe lack of accessible green space for both people and nature in this part of Leicestershire.

Where?

The 520 acre site of Shawell quarry near Lutterworth, which has been worked continuously for over 60 years, and is soon coming to an end.

WHAT'S THE FUSS ABOUT?

The deal has always been to return the land to nature when quarrying finishes. However, Harborough District Council and Leicestershire County Council are now considering proposals and legal changes which would rip up this longstanding agreement and see yet more countryside disappear for good. **We need to act NOW!**
